USERS

POST /api/v1/login

Description:

User authorization.

Parameters:

- In body:
 - email – type string (required)
 - password – type string (required)

Responses:

- 200 OK
 - JWT in Cookie
 - 401 Wrong credentials
-

POST /api/v1/account/logout

Description:

Logout user, adding token to blacklist.

Responses:

- 200 OK
-

POST /api/v1/users

Description:

Create user. Create new catalog in main server catalog with name like user's email – place where user's photos will be stored.

Parameters:

- In body:
 - email – type string (required)
 - password – type string (required)
 - firstName – type string (required)
 - lastName – type string (required)

Responses:

- 200 OK
- 400 Bad request

GET /api/v1/users

Description:

Load list of app users data.

Responses:

- 200 OK
 - userID – type long
 - email – type string
 - firstName – type string
 - lastName – type string
 - password – type string
 - role – type string
 - 401 Unauthorized
-

GET /api/v1/users/{email}

Description:

Load user data, or id if it is not current user.

Parameters:

- In path:
 - email – type string (required)

Responses:

- 200 OK
 - userID – type long
 - email – type string
 - firstName – type string
 - lastName – type string
 - password – type string
 - role – type string

OR

 - userID – type long
 - email – type string
- 400 BAD REQUEST

PUT /api/v1/users

Description:

Edit user.

Parameters:

- **In body:**
 - password – type string (not required)
 - firstName – type string (not required)
 - lastName – type string (not required)

Responses:

- 200 OK
 - 401 Unauthorized
-

DELETE /api/v1/users

Description:

Remove user and all related data.

Responses:

- 200 OK
- 400 Bad request

PHOTOS

POST /api/v1/photos

Description:

Create photo info.

Parameters:

- In body:
 - name – type string (required)
 - description – type string (not required – default NULL)
 - shareState – type string (not required – default “PRIVATE”)
 - photoState – type string (not required – default “ACTIVE”)

Responses:

- 200 OK
 - id – type long
 - 400 Bad request
-

PUT /api/v1/photos/{id}

Description:

Edit photo info.

Parameters:

- In body:
 - description – type string (not required)
 - shareState – type string (not required)
 - photoState – type string (not required)

Responses:

- 200 OK
- 400 Bad request

DELETE /api/v1/photos/{id}

Description:

Remove photo and all related data, include image.

Parameters:

- **In path:**
 - id – type long (required)

Responses:

- 200 OK
- 400 Bad request
-

 - photoID – type long
 - name – type string
 - user – type string
 - uploadTime – type timestamp
 - description – type string
 - rate – type int
 - tags –
 - tagID – type long
 - name – type string
 - photo_id - type long
- 204 No content

PHOTOS PRIVATE

GET /api/v1/photos

Description:

Load list of private photos info sorted by upload time descending.

Responses:

- **200 OK**
 - photoID – type long
 - name – type string
 - user – type string
 - uploadTime – type timestamp
 - description – type string
 - rate – type int
 - tags –
 - tagID – type long
 - name – type string
 - photo_id - type long

- **204 No content**
-

GET /api/v1/photos/id/{id}

Description:

Load private photo by id.

Parameters:

- **In path:**
 - id – type long (required)

Responses:

- **200 OK**
 - photoID – type long
 - name – type string
 - user – type string
 - uploadTime – type timestamp
 - description – type string
 - rate – type int
 - tags –
 - tagID – type long
 - name – type string
 - photo_id - type long
- **204 No content**

GET `/api/v1/photos/name/{name}`

Description:

Load list of private photos by name.

Parameters:

- In path:
 - name – type string (required)

Responses:

- 200 OK
 - photoID – type long
 - name – type string
 - user – type string
 - uploadTime – type timestamp
 - description – type string
 - rate – type int
 - tags –
 - tagID – type long
 - name – type string
 - photo_id - type long
- 204 No content

GET `/api/v1/photos/shared`

Description:

Load list of private photos which are shared to the current user sorted by upload time descending.

Responses:

- 200 OK
 - photoID – type long
 - name – type string
 - user – type string
 - uploadTime – type timestamp
 - description – type string
 - rate – type int
 - tags –
 - tagID – type long
 - name – type string
 - photo_id - type long
- 204 No content

GET /api/v1/photos /tags/any/{tags}

Description:

Load list of private photos which has any of tags sorted by rate descending.

GET /api/v1/photos /tags/all/{tags}

Description:

Load list of private photos which has all of tags sorted by rate descending.

Parameters:

- In path:
 - tags – type string (required) example “ .../all|any/1,2,3... ”

Responses:

- 200 OK
 - photoID – type long
 - name – type string
 - user – type string
 - uploadTime – type timestamp
 - description – type string
 - rate – type int
 - tags –
 - tagID – type long
 - name – type string
 - photo_id - type long
- 204 No content
